

Plain vs HTML content of field

Problem: how to get plain or HTML version of Jira field?

Solution: Refer to the table below to find the right syntax that allows to you reference plain or HTML content of particular Jira field

Jira field	Plain	HTML
comment	<code>\$issue.fields.comment.comments.body</code>	<code>\$issue.fields.comment.comments.bodyHTML</code>
description	<code>\$issue.fields.description</code>	<code>\$issue.fields.descriptionHTML</code>
