

Notifying a Jira group

Question: I need to send a notification to all members in particular Jira group. How do I do that?

Answer: You'll need to use our custom function `$jirassimo.groupEmails("JIRA_GROUPNAME")`. The function will return a comma-separated list of email addresses of people belonging to specific Jira group. Here's an example how to configure it:

Send to *

EMAIL

Subject *

An email to Support Partner P4

Issue field picker

To *

Choose JIRA fields

`$jirassimo.groupEmails("SUPPORT_P4")`
