## How to notify mentioned users

User mentions in form of Vlad can be added in Jira text fields like description, comments etc. A typical business requirement is to notify that user when he or she is mentioned.

To make it happen, you need to extract mentioned users from specific field and use the returned value as text email destination like shown on the screenshot below:

Send via*	EMAIL	~	
то			\$jirassimo.mentionsEmails(\$issue.addedComment.body)
	Choose JIRA fields	~	
	Do not notify author of the chang	e 🗌	

The invocation of \$jirassimo.mentionsEmails() will parse newly added comment's body for mentioned users and return a comma-separated list of emails.

Another option is to use a special Notification configuration like the one shown below:

## Notification details

Title*	tle* Mention notification				
	Give your notification a name				
Enabled					
	You can disable your configuration temporarily in	needed			
Audit enabled					
	When checked, Raley will log every sent messag	e under issue's activity tab: Raley Audit			
Notification type*	JIRA issue event V				
Project*	FFF - FFF × •				
Issue type*	Any × •				
issue type	Ally ^				
Event*	Issue mention V				
Send via*	EMAIL 🗸				
то	Mentioned users × •	Comma-separated emails or lists			
Notify author	Don't notify				
СС	Choose JIRA fields	Comma-separated emails or lists			
BCC	Choose JIRA fields	Comma-separated emails or lists			
Send as	Miltiple Emails				
Subject <sup>*</sup>	You were mentioned in issue \$issue.key				
		ĥ			
MIME type	Multipart text/html				
Outgoing email server	Jira outgoing email server 🗸 🗸				
361 761					
Message template*	\$!issue.mention.text				

This notification configuration will be fired when mentions appear in project FFF.

The email message will contain text where the user(s) were mentioned in  $\ensuremath{\mathsf{HTML}}$  format.
